---

we can consider this that we filipinos are still a puppet of the USA during marcos regime until this present administration we can consider ourself of a person who westernized for our own greed. also we can consider GMA's visit to white house is a term of "PAKITANG TAO" because national election is present already in four corners of our nation. it only explain that this visit maybe a political agende of the administration also the palace to lift up the name of the president.
