We need to rid our government of corruption for it to be effective to eliminate poverty. As it is, a corrupt government thrives on giving dole-outs to the poor to solicit support, rather than engaging in efforts that can actually lift people out of poverty. Why are squatters tolerated? Why are illegal vendors left to exist? These are potential voters, and these are the people who corrupt politicians pander to to solicit votes by dangling promises of redemption. In the end, they are abandoned and left hoping for the next messiah come next election cycle. Kung walang corrupt walang mahirap. Noynoy is leading the ultimate fight against the purveyors of poverty with the belief that when we eliminate those who cater false hope, and replace them with men of honor and integrity, we can rise as a nation. Reality Check: We need a president with a clear solution against poverty, and that is Noynoy. Kung walang corrupt, walang mahirap. [Joomla SEO powered by JoomSEF](#)
