

After Overseas Filipinos start their computer in the morning

1. They open a new file.
2. Then they name the new file "Gloria Arroyo."
3. Then they send it to the Recycle Bin.
4. Then they empty the Recycle Bin.
5. Their PC will then ask: "Do you really want to get rid of 'Gloria Arroyo'?"
6. They firmly click, "Yes."
7. Then they start to feel better and look forward to the rest of the day with positive outlooks.

When they come home in the evening, they repeat the same process but name the new file "Mike Arroyo." Then they sleep soundly. # # # [Joomla](#)
