February is ProLife month. Here are some suggestions that ordinary people can do this month -- or any time of the year -- to promote a Culture of Life.

1. Expose the lie that contraception can lead to fewer abortions. The exact opposite is true. There is information on that issue in the ProLife Philippines website, www.LifeSiteNews.com Human Life International, Population Research Institute, and many others. Download and pass this information around via e-mail, text messages, instant messaging, and if you can afford to, print them out as flyers and handouts.
2. Vote and speak out against the authors and supporters of the anti-life bills in the Senate and in Congress. These include Rep. Lagman, Rep. Remulla and Sen. Biazon (not sure if Biazon will run again though). Write to your local and national legislators and oppose the various "reproductive health" ordinances which are promoting the contraceptive mentality that eventually leads to abortion.
