

Part XI of a Series on “Saving Our Sorsogon (SOS) Bay”

Finally this publication has obtained a copy of the Bacon-Manito (Bac-Man) Geothermal Project EIA supposedly done in 1985. Apparently the Energy Development Corporation of the Lopez Business Empire did not undertake to submit THIS YEAR an updated Environmental Impact Report (EIR) even if the Bac-Man Plant doubled its capacity as of June 2011. The City and Provincial Governments of Sorsogon should have conducted public hearings on the revised EIR before approving permits for the doubling of the geothermal plant's output.
